

ECOR® BASIC

# STANDARD PANEL

## FLATCOR PANEL SIZES

3049 x 1220 x 2 mm  
3040 x 1210 x 2.5 mm

They are also available in the dimensions according to customer demands to standard size.

It's possible to laminate more panels to obtain desired thickness / multi-plys.

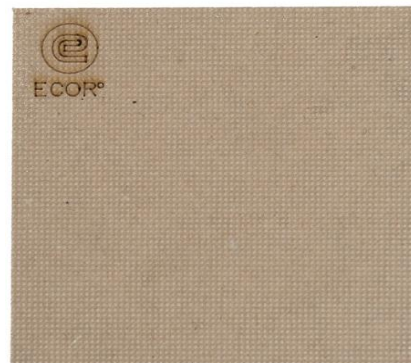

Thanks to its flexibility various forms and shapes can be achieved: bows, half-curves, curves.

ECOR® The sustainable alternative to traditional wood, particleboard, fiberboard, aluminum, plastic and composites.

ECOR® is an advanced environmental composite panel formed from abundant cellulose and recycling materials combined with pressure and heat to create high performance panels with unlimited applications.

Representing the future of sustainable design, ECOR® is in a class of its own for architects and designers who demand sustainable products with superior design attributes.

ECOR® comes in basic form: FlatCOR™. Panel can be clear coated and used in natural form, or treated with standard paints, sealers and decorative coatings. The question is, what can't it be?

- » Made from 100% recycled materials.
- » Formaldehyde-free, non-toxic with zero off-gassing.
- » Can be clear-coated to provide a moisture barrier.
- » 100% Bio-based
- » Cradle to cradle material.
